

Every American deserves an opportunity to study, understand, and contribute to the arts and humanities. This must begin in our schools, where children may have their first and most important exposure to these disciplines. Working on their own masterpieces and finding inspiration in the work of others, young people are opened to new means of expression that sharpen their creative faculties. An education in music, dance, drama, design, and fine art reinforces skills in fields like math and science, and it can help students reach their full potential. In an ever-changing world, we must prepare our students with the knowledge, creative skills, and an ability to innovate so they can compete and succeed on a global stage.

As a people, we have an unlimited capacity for self-expression and personal interpretation. While we may not always agree with what we see or hear, it is our open-mindedness that commends the artistic struggle behind the creation and our curiosity that pursues its vision. This month, we honor this artistic spirit that lives and breathes within every American. Creativity and a thirst for understanding are the fuel that has fed our Nation's success for centuries, and they will continue to be well into our future.

NOW, THEREFORE, I, BARACK OBAMA, President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim October 2009 as National Arts and Humanities Month. I call upon the people of the United States to join together in observing this month with appropriate ceremonies, activities, and programs to celebrate the arts and humanities in America.

IN WITNESS WHEREOF, I have hereunto set my hand this second day of October, in the year of our Lord two thousand nine, and of the Independence of the United States of America the two hundred and thirty-fourth.

BARACK OBAMA

Proclamation 8431 of October 2, 2009

National Energy Awareness Month, 2009

By the President of the United States of America

A Proclamation

A more prosperous future for our Nation's economy means making investments in energy efficiency and clean energy today. Well-funded energy research and development will not only help protect our environment and support our communities, but it will also address concerns of global competitiveness and national security. Innovation in energy technology will decrease our oil use, strengthen our economy, and reduce the dangerous pollution that causes climate change.

As American scientists, engineers, and entrepreneurs bring new and improved energy technologies to homes and businesses in this country and around the world, they will be showing American leadership and vision while also making clean energy the profitable kind of energy. During National Energy Awareness Month, we recognize the contributions of individuals, organizations, and companies that are committed to advancing energy

innovation and efficiency, and we promote the importance of a clean energy economy to our Nation.

The Federal Government is the largest consumer of energy in the United States, and my Administration is committed to leading by example in the use of clean energy and increased energy efficiency. Not only will we lead through our performance, we will also leverage our ability to be the kind of customer that can help turn an idea into a great American enterprise. Through State and local grants, increased funding for weatherization programs, job training programs, and policies to support clean energy businesses, we are ushering in a new era of green energy that will benefit our economic recovery, our security, and our long-term prosperity.

We face a turning point in our Nation's energy policy. We can either remain the world's leading importer of oil, or we can become the world's leading exporter of clean energy technology. We can allow climate change to wreak unnatural havoc, or we can create jobs deploying low-carbon technologies to prevent its worst effects.

Throughout our history, Americans have successfully confronted challenges that have tested our determination and our capacity to change. If we are to advance energy and climate security, we must focus on energy efficiency, promote sustainable industries, accelerate job training and job creation in these areas, and set effective and achievable standards for the generation and use of clean energy. As a Nation, we will lead by innovating, adapting to the global marketplace, and investing in the kind of sustainable future we want for the generations to come.

NOW, THEREFORE, I, BARACK OBAMA, President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim October 2009 as National Energy Awareness Month. I call upon the people of the United States to mark this month by making clean energy choices that can both rebuild our economy and make it more sustainable.

IN WITNESS WHEREOF, I have hereunto set my hand this second day of October, in the year of our Lord two thousand nine, and of the Independence of the United States of America the two hundred and thirty-fourth.

BARACK OBAMA

Proclamation 8432 of October 2, 2009

Fire Prevention Week, 2009

*By the President of the United States of America
A Proclamation*

As powerful as any force in the natural world, fire deserves our utmost attention. Unchecked, fire can destroy homes, devastate our environment, and, at its worst, injure or fatally harm individuals. Fire Prevention Week is a time to learn about important fire safety issues and empower our communities to stay "Fire Smart." It is also a time to honor our Nation's brave firefighters and volunteers who risk their lives to protect their fellow Americans.
